Includes new products for 2021/2022

A photograph of tall grasses reflected in water at sunset or sunrise, with the text "DISCOVER PERFECTION" overlaid in white. The scene is captured in a vertical orientation, showing a dense thicket of tall grasses in the upper half, their golden and green hues mirrored in the calm water below. The lighting is warm and soft, creating a serene and peaceful atmosphere. The text is centered and written in a bold, white, sans-serif font, with the words "DISCOVER" and "PERFECTION" stacked vertically.

FOUNTAINS & FOUNTAIN PUMPS

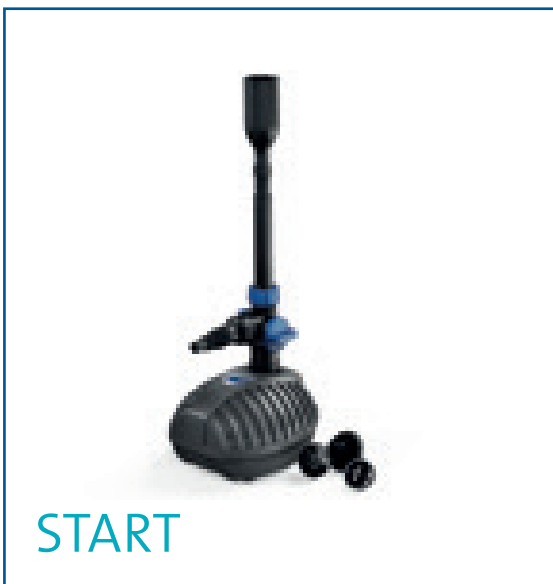

Fountain pumps

- 6 Aquarius Fountain Set Classic E
- 8 Aquarius Eco Expert 12 V

AQUARIUS FOUNTAIN SET CLASSIC

An economical all-rounder – now in three new sizes with sophisticated pump technology

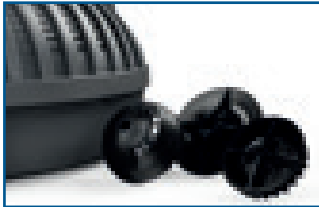

- Energy-efficient water feature pump with three attractive nozzle patterns
- Second, separately adjustable outlet
- Includes three fountain attachments and telescopic pipe extension with integrated swivel head for a variety of water patterns
- Easy mechanical adjustment of the fountain height
- Energy consumption is reduced by up to 40 % in comparison to previous models thanks to the economical pump technology – while maintaining a high water pressure and a high flow rate
- Integrated thermo protection

PRODUCT DETAILS

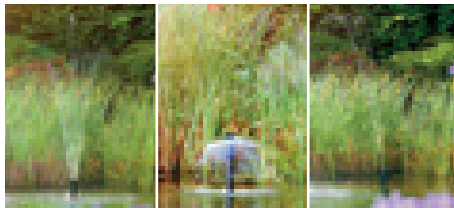

Second outlet

On the second separately adjustable outlet, a small watercourse or water spout can be connected. Suitable for ½" to 1" (13 to 25 mm) hoses.

Water patterns

Three different fountain attachments are included in the scope of delivery: Vulcan, Lava and Magma.

Vulcan		Lava		Magma		
Ø cm	H cm	Ø cm	H cm	Radius/cm	H cm	
45	70	20	–	60	70	Aquarius Fountain Set Classic 750
70	75	35	–	70	80	Aquarius Fountain Set Classic 1000
120	155	65	–	120	155	Aquarius Fountain Set Classic 2000 E
160	195	75	–	150	190	Aquarius Fountain Set Classic 3000 E
180	220	80	–	180	220	Aquarius Fountain Set Classic 4000 E

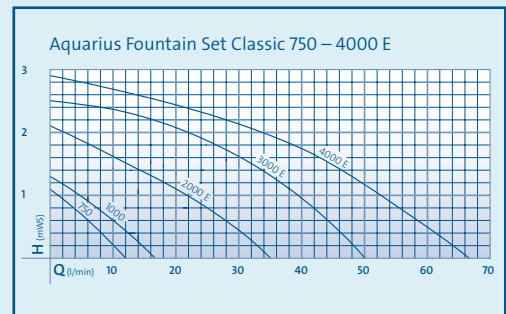

Extras

Top product characteristics

- Particularly economical – effectively reduces running costs
- Includes three fountain attachments and an optimised nozzle bracket
- Second outlet that can be adjusted separately for small watercourses or water features

Recommendation

Extend the service life of your pump and ensure lasting high performance with the special AquaActiv PumpClean cleaner.

Extras

Top product characteristics

- Suitable for networks and powerhouse with low energy consumption
- Patented frost protection to -20°C
- Switchable dynamic program for impressive fountains

Recommendation

With the OASE fountain attachments, different water patterns can be created to suit your taste. The fountain attachments can be staged in combination with the matching optional OASE illumination. For an attractive bubbling stone water pattern, for pump selection, calculate 0.5 – 1 l / min water per cm of stone diameter. Extend the service life of your fountain and ensure lasting high performance with the special AquaActiv PumpClean cleaner.

AQUARIUS ECO EXPERT 12 V

Dynamic, variable water patterns – even in swimming ponds

- Network-enabled, energy-efficient pump generation with extremely powerful yet economical pump capacity – now available with safer 12 V technology for swimming ponds and natural pools (Aquarius Eco Expert 20000/12 V)
- Alternating fountain heights can be individually switched with power consumption in-line with demand
- Robust and durable stainless steel housing for stability
- Ergonomic handle for easy transport and installation
- Unique, patented frost protection: the pump will not be damaged at temperatures down to as low as -20°C
- Suitable for submersed or dry use or for extended use in sea water
- With adapter set for connection of 1" and 1 1/2" nozzles
- MADE IN GERMANY: precise and reliable German engineering skills at a particularly high quality level
- Protection against running dry and blocking through Environmental Function Control (EFC by OASE)
- System requirements: To use the EGC functions, an InScenio EGC Controller Home/Cloud, InScenio FM-Master EGC Home/Cloud, InScenio FM-Master WiFi EGC or InScenio FM-Master WiFi Version 2.0 or later is required

*»Environmental Function Control«
The pumps automatically switch off if they run dry or become blocked, preventing damage to the device.*

Aquarius Eco Expert 20000/12 V

- This electronic switching power supply was developed in-house and is perfectly designed for transforming an electricity supply from 230 V to 12 V

PRODUCT DETAILS

Robust filter basket

Thanks to this robust stainless steel filter basket, coarse debris particles up to 4 mm in size are easily displaced.

Adapter set

An adapter set for connecting all 1" and 1 1/2" OASE fountain attachments is included in the scope of delivery of the Aquarius Eco Expert fountain pumps.

Handle operation

The ergonomic handle, aligned with the pump's centre of gravity facilitates transport and installation. The switch for the dynamic function is positioned directly on the handle.

Connection for EGC

Innovative, convenient and handy. The Eco Expert pumps can be regulated and operated by control devices such as the Eco-Control, all via EGC-Connection.

FILTER, WATERCOURSE AND SWIM POND PUMPS

Filter, Watercourse and Swim pond pumps

- 12 AquaMax Eco Premium 12 V
- 14 AquaMax Eco Expert 12 V
- 16 AquaMax Eco Titanium

AQUAMAX Eco PREMIUM 12 V

Efficient water movement at multiple pond zones, especially for swimming ponds

»Environmental Function Control«
The pumps automatically switch off if they run dry or become blocked, preventing damage to the device.

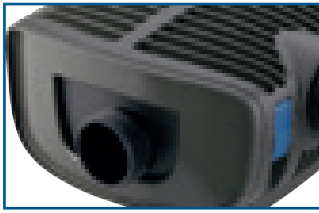

AquaMax Eco Premium 6000 / 12 V

PRO

- Can displace plant remains or fish waste particles up to 11 mm
- Supplementary, patented connection of filter accessories for debris supply from more distant pond zones
- Outstanding energy balance: reliable displacement using even less energy
- Elegant design with clever operating elements
- Maximum convenience thanks to ergonomic and easily accessible handles
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- **MADE IN GERMANY:** precise and reliable German engineering skills at a particularly high quality level
- With safe 12 V technology perfect for use in swimming pools and natural pools

PRODUCT DETAILS

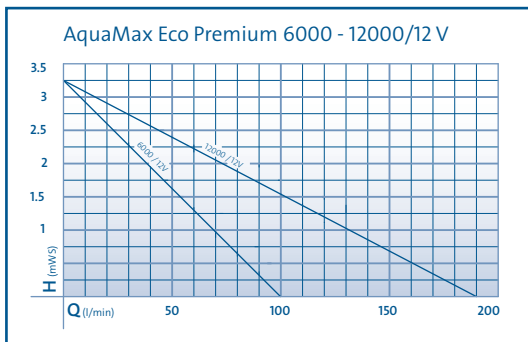

Regulation + 2nd Inlet

A 2nd inlet allows connection of a satellite filter or surface skimmer. This allows the flow through to be mechanically adjusted from 0 to 100 %.

12 V power unit

For safety, low voltage transformer, suitable for swim ponds. Power unit must be setup at least 2 m from the pond.

Extras

Top product characteristics

- Energy efficient with a high flow rate
- Network-enabled and equipped with Seasonal Flow Control and Environmental Function Control
- Perfect for use in swimming ponds and natural pools thanks to safe 12 V technology

Recommendation

The AquaMax Eco Expert makes it incredibly easy to supply large filter systems for koi ponds, swimming ponds, sophisticated watercourses and waterfalls. The InScenio FM-Master EGC or the EGC controller accessory can be used as smart controls to adjust the performance of these energy-efficient powerhouses, control each unit individually and read out values. New: Now also available in 27,000 l/h size as a 12 V version — ideal for swimming ponds and natural pools!

AQUAMAX ECO EXPERT 12 V

Energy-efficient powerhouses for even the most demanding of systems – ideal for swimming ponds and natural pools

»Seasonal Flow Control«
 The pumps adapt to the pond ecology throughout the year and support the pond biology through temperature-dependant water circulation.
 »Environmental Function Control«
 The pumps automatically switch off if they run dry or become blocked, preventing damage to the device.

AquaMax Eco Expert 27000 12 V

PRO

- Ideal for demanding filter systems used in large watercourses and waterfalls, while the 12 V version is perfect for swimming ponds and natural pools, even if they contain sea water!
- Extreme performance with an energy-efficient pump capacity
- Very high efficiency with excellent pump capacity for coarse debris particles up to 11 mm in size
- Robust and durable stainless steel housing
- Unique patented frost protection down to -20°C
- Can be set up underwater & dry installed
- Patented »Seasonal Flow Control« for intelligent and environmentally-conscious regulation of flow rate and delivery head
- Innovative Environmental Function Control: Optimal device protection as the system shuts off automatically if it runs dry or if there's a blockage
- MADE IN GERMANY: precise and reliable German engineering skills at a particularly high quality level
- System requirements: To use the EGC functions, an InScenio EGC Controller Home/Cloud, InScenio FM-Master EGC Home/Cloud, InScenio FM-Master WiFi EGC or InScenio FM-Master WiFi Version 2.0 or later is required

PRODUCT DETAILS

Robust filter basket

Thanks to this robust stainless steel filter basket, coarse debris particles up to 11 mm are displaced with ease.

12 V power unit

For safety, low voltage transformer, suitable for swim ponds. Power unit must be set up at least 2 m from the pond.

Convenient operation

The ergonomic handle, aligned with the pump's centre of gravity facilitates transport and installation. The switch for SFC function is practically positioned directly on the handle.

Connection for EGC

Innovative, convenient and handy. The Eco Expert pumps can be regulated and operated by control devices such as the Eco-Control, all via EGC-Connection.

AQUAMAX Eco TITANIUM

Full speed ahead for gravitational filter systems – even on koi ponds!

»Environmental Function Control«

The pumps automatically switch off if they run dry or become blocked, preventing damage to the device.

»Seasonal Flow Control«

The pumps adapt to the pond ecology throughout the year and support the pond biology through temperature-dependant water circulation.

AquaMax Eco Titanium 31000

AquaMax Eco Titanium 51000

AquaMax Eco Titanium 81000

PRO

- Pumps coarse debris up to 6 mm in size
- Innovative, energy-efficient gravity filter pump for large bodies of water, even with koi stock
- Flow-optimised hydraulics help to achieve an outstanding level of efficiency
- Robust pump housing made of cast stainless steel with large base for safe placement
- Rotor shaft and bearings made from high-quality SIC ceramics for optimal reliability and longevity
- Suitable for submersed or dry use – even in sea water
- Ideal for installation in a pump chamber
- Protection against running dry and blocking through Environmental Function Control (EFC by OASE)
- Patented Seasonal Flow Control (SFC) for intelligent and environmentally conscious regulation of flow rate and pump head height
- Using optional accessories, when the SFC function is enabled, an extra 30% can be saved in energy
- MADE IN GERMANY: precise and reliable German engineering skills at a particularly high quality level
- System requirements: To use the EGC functions, an InScenio EGC Controller Home/Cloud, InScenio FM-Master EGC Home/Cloud, InScenio FM-Master WiFi EGC or InScenio FM-Master WiFi Version 2.0 or later is required

PRODUCT DETAILS

Robust pump housing

Cast stainless steel enables the achievement of durable, above-average precision and energy-efficiency. The entire pump housing can be adjusted upwards by 90°.

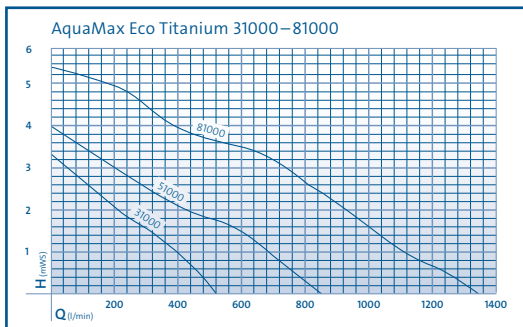

Special channel-type impeller

The impeller impresses through its extremely long service life. Even under continuous load, signs of wear cannot be detected.

Connection for EGC control devices

The pump can be conveniently operated via innovative control devices such as the Eco Control.

POND TREATMENTS & FISH MEDICINES

AquaActiv Pond Treatments

24 Improving water quality – DuoBoost

DuoBoost

Provides optimal support of the pond biology – with 2-phase effect

DuoBoost has been specially developed to support pond biology. It consists of two complementary phases of action:

The **first** phase of action is a **gel** that is placed straight in the pond or the filter chamber. This gel is a highly active fluid containing enzymes and bacteria that removes organic dirt, ammonium and nitrite. The filter bacteria are activated at the same time.

The **second** phase of action is a **ball** measuring 2 cm or 5 cm in diameter that dissolves over time, releasing important trace elements, cosubstrates, minerals and valuable additives that are otherwise difficult to put into an artificial pond.

If required, you can repeat treatment with DuoBoost several times a year. Both phases lay the foundations for achieving clear, healthy water and exceptional pond biology. If the water is green, however, you should use a UVC clarifier to remove the algae causing the problem.

DuoBoost

Effective water treatment

- Significant improvement of water quality and pond biology
- Simple to use, as often as required
- Important trace elements and minerals for all pond types

The gel and balls can be placed straight in the filter or the pond. The balls will dissolve completely over time. If the pond contains fish, place the balls in the enclosed net before using them.

NEW

AquaActiv	DuoBoost			
Container size	250 ml	2.5 l		
Ball diameter	cm	5	2	
Suitable for ponds up to max.	m³	20.0	30.0	90.0
Item no. (GB-Version)	-			
Item no.	78110	78111	78112	

DuoBoost COUNTER DISPLAY

- Compact counter display for marketing support
- Equipped with 18 sales units
- Easy assembly with easy reloading

The display is ideal for placing near the counter. The display can be reused for different products and is easy to assemble. Its compact size makes it suitable even for smaller sales areas.

Info

Safe use

When stocked with fish, the DuoBoost balls can be placed in a practical net.

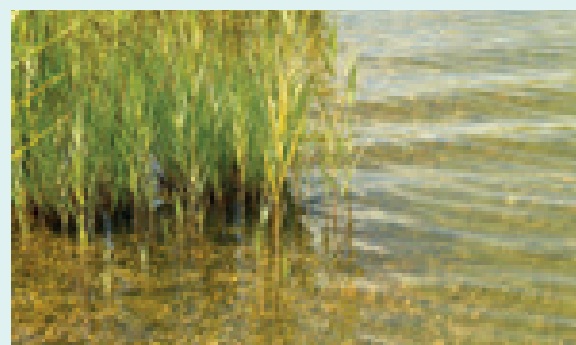

Rapid development of filter biology

To support pond biology, the DuoBoost balls can be inserted directly into the filter.

The foundation for clear water

By supporting pond biology and improving water quality, the foundation for a healthy body of water is created.

COPPER FOUNTAIN BOWLS

Sophisticated copper water bowl

- Elegant design highlight made from real copper, suitable for small and large gardens
- These copper bowls offer a wide range of design options: choose between a round or a square design, with or without an outlet, and then choose where to put it – for example by the terrace or as part of a pond landscape
- The water inlet and cable bushing for the lighting (1 1/2" each) are positioned at the base of the bowl, so they cannot be seen from the outside
- Available with a pedestal for a waterfall installation consisting of two copper bowls
- As it ages, copper forms its typical, attractive patina

Extras

Top product characteristics

- Solid brass
- Can be illuminated from the inside
- Includes drip edge for a consistent water pattern

Accessories NEW

Wall Spout LED warm white
 Universal lighting for wall outlets and spring stones with replaceable, warm white LED unit – perfect for use with existing halogen lamps.

Item no. 84183

Connection Kit Wall Spout

Quick and easy installation of the wall outlets on any wall. Also simplifies the subsequent installation of the wall spout lighting.

Item no. 85857

Transformer 30 VA with 3 outputs

12 V transformer suitable for LED ring (art. 84171) and/or wall spout lighting (art. 84183). Up to 3 LED rings or wall spout lights can be operated simultaneously.

Item no. 85858

Item no. 85859 (GB-Version)

FORMAL SPILLWAY

A compact water feature that's ideal in small spaces

- Water spout made of robust, solid brass
- Four shapes available in two colours
- The integrated drip edge prevents backflow beneath the spout
- Can be illuminated from the inside for impressive lighting effects
- Also ideal for columns and narrower walls less than 1 ½" as the water inlet is at the back

Extras

Top product characteristics

- Complete set for natural-effect watercourses
- Everything included
- Easy to install

Recommendation

Add natural stones to your watercourse source to create a natural-looking and voluminous watercourse. The pond liner can be easily and securely attached to the back of the watercourse source by means of a liner flange, so that nothing stands in the way of watercourses with a high flow rate.

BASIC WATERCOURSE SETS

Everything you need for a natural-effect watercourse

- Sets that contain everything you need to build a natural-effect watercourse – from the pump and the reservoir to the connection elements
- Designed to work perfectly with one another
- Quick and easy to install
